ASTM

KRUSHERS have been designed and engineered to meet harsh working conditions. KRUSHERS are tough and strong keep going when other safety shoes have worn out. The superior KRUSHERS TPU direct injection sole is the toughest soling material in safety footwear. Make your budget go further by wearing the long-lasting KRUSHERS brand. **Krushers footwear are available in sizes 4 to 13" (including half sizes).**

lace-up shoe  
Available in black or brown

### Standard Product Features

**Slip Resistant TPU** (Thermoplastic Urethane) outsole that exceeds minimum requirements under classification "SRC" (refer results back page). Sole heat resistant to 130°C.

### Optional Product Features

**Penetration Resistance** a steel midsole is permanently fitted in the sole to reduce the risk of sharp objects penetrating through the sole.

**Metatarsal Protection** device if permanently fitted to the top of the boot, just behind the toecap to give the foot further protection from falling or rolling objects.

**Nitrile Rubber Outsole** gives the wear added protection from heat up to 300°C.

**Antistatic** designed to reduce the build up of excess static electricity while maintaining a high level of resistance to protect the wearer from live electrical circuits of up to 250 volts.
